

PROBLEM -> BUILD -> IMPACT

BUILD

PILOT v1.0

A school-embedded innovation system
turning secondary students into builders of
real community solutions.

PILOT

50 schools
900-1,000 students
30+ solutions

50

SCHOOLS

1,000

STUDENTS

30+

SOLUTIONS

TOP 3

ACCELERATED

The students are ready. The system is missing.

Technology exposure is not innovation capacity.

BUILD connects problems, digital tools, mentors, teachers, and public accountability inside the school environment.

Theory first

Few mentors

No build rhythm

Low community validation

This is not theory for Tech Now Global.

TNG is already known for youth digital literacy, quality education, and opportunity programs for underserved communities.

5

YEARS BUILDING

100+

SCHOOLS REACHED

32

COMMUNITIES

PUBLIC CREDIBILITY

Punch reported TNG's Badagry origin and reach. Ashoka lists David Onilude as a Young Changemaker. Teen Vogue profiled him as a 21 Under 21 digital educator.

Young people can name the problems. Few get to build the answers.

01

Classroom learning stops before real-world building

02

Schools lack a repeatable innovation operating system

03

Communities need local builders with local context

Infrastructure, not an event.

Not a hackathon. Not an ICT class. Not a one-week poster moment.

BUILD installs a repeatable system: Teacher Champions, student teams, mentors, validation, prototypes, Demo Day, and a post-program pathway.

The school becomes a launchpad.

LIVE

[cohort_01] ▲ LOADED 50 schools across Badagry Division · 900-1,000 students
[cohort_01] ▲ LOADED 60 Teacher Champions · 15+ domain-matched mentors
[cohort_01] ★ NOTE Cost to schools: ₦0 // Top 3 teams → accelerator pathway
[cohort_01] ▲ RUNNING Sep → Oct 2026 · Demo Day in Nov

— FIRST OF ITS KIND IN LAGOS —

BUILD

School-embedded innovation infrastructure
where students build real digital
solutions to *actual community problems*.

// COHORT **SEP / OCT · 26** BADAGRY · NG

// SCHOOLS	// STUDENTS	// TEACHERS	// TOP 3
50	900-1,000	60 Champions	→ Accelerator

#ReachingTheUnreached technowglobal.org/build COHORT 01 · LIVE

A method simple enough to teach. Strong enough to repeat.

B

Begin with the problem

U

Understand the community

I

Iterate solutions

L

Lead with empathy

D

Deliver impact

No solution before community understanding. No Demo Day before validation.

6-7 weeks from readiness to public proof.

W0

Bootcamp

teams formed

W1-2

Validate

problem evidence

W3-5

Build

prototypes

W6-7

Demo Day

Top 10

POST

Pathway

Top 3

A pilot big enough to matter. Small enough to prove.

50

schools

60Teacher
Champions**30+**student-built
solutions**900-
1,000**

students

15+

mentors

20+

working prototypes

1,000**students activated across
Badagry Division**

The goal is not just participation.
The goal is a repeatable school
innovation model partners can
scale.

Students do not pitch ideas. They ship evidence.

Web apps. Mobile tools. WhatsApp/chatbots.
Process innovations. The format follows the
community problem.
